

Trakz

Tub Sliders

Trakz is a tub slider that consists of a mobility base, a tub base and a bridge. This system allows the user to be showered over a bathtub.

Trakz-AT (tilting)

FEATURES

Patented Zbrilok™ Safety System – Trakz is the world's first tub slider system with a patented safety feature that prevents the seat and user from moving onto the bridge unless the bridge is securely latched to both the tub base and the mobility base. This patented design, available only from Raz, can prevent serious injuries.

Rotational Tilt – Dual-Arc Tilt Geometry (Trakz-AT only)

- 35-degree tilt range – for pressure redistribution, trunk positioning and raising client's feet high enough to clear the tub wall
- Rotational tilt geometry reduces tilt effort and allows the Trakz to be mounted much closer to the rear wall
